

## ***Product information***

### **Bomo-Flex-NL**

**Application:** Bomo-Flex-NL is a thermally transferable polyurethane film with special heat sealing adhesive for labeling of hydrophobic and water-repellent nylon fabrics. By laminating a transparent self-adhesive PET film Bomo-Flex-NL guarantees excellent cutting and weeding characteristics. The raw materials are ecologically harmless and free of PVC plasticizers or heavy metals (in accordance with Oeko-Tex Standard 100).

**Resistance:** Washable up to 40 °C. Wash textile inside out.  
Do not use softener and dryer

<b>Transfer:</b>	material	temperature	time	pressure
	Nylon	150 °C	<u>press for 4 sec</u> pull off polyester carrier lukewarm <u>repress for 10 sec</u>	2.0 bar

**Colors:** black, white, yellow, red, orange, grey, light blue, green, gold metallic, silver metallic

<b>Dimensions:</b>	roll width	50 cm
	roll length	25 lfm

**Comment:** This information is intended as a guideline for the application. Depending on the materials used, the transfer parameters must be adjusted accordingly. The information is based on the current technical standard.
