

Product Information

Bomo-Flex Print Fluo Yellow

PU – transfer paper for solvent printers
(Eco-solvent and solvent inks)

Bomo-Flex Print Fluo Yellow is a thin transfer film in neon yellow color.

The neon yellow is even after the print still clearly visible whereby very interesting color schemes are possible. Please note that the inks due to the foil colors can significantly change on the film more or less.

Bomo-Flex Print Fluo Yellow is used to print motifs and logos that are applied to sports and casual wear. Bomo-Flex Print Fluo Yellow is a heat-sealable, printable PU textile transfer film suitable for application on light and dark fabrics (cotton, 70%cotton + 30%lycra, nylon and non-dyed polyester). Not suitable for heat transfer are sublimation dyed polyester fabrics and textiles that have a water-repellent finish or impregnation.

Processing:

Foil printing on the true side, plot, and weeding. The transfer to the textile by means of Bomo-Flex-Tape foils. Bomo-Flex Tape 25 cm wide is recommended.

Transfer requirement

Temp: 150 °C (cotton), 130-140 °C (nylon)

Time: 12 sec (cotton), 10 sec (nylon)

Pull transfer tape warm and hot press foil (10 sec cotton, polyester / 5 sec nylon)

Pressure: medium pressure

Wash resistance

Washable up to 40°C (30°C nylon)

- Only color or mild detergent
- Wash and iron textiles always inside out
- **NOT** suitable for dryer

Particular feature

Wash textile not before 48 hours after printing.

For larger, coherent designs starting from approx A5 size, the washing resistance may deteriorate.

Therefore, we recommend to carry out appropriate washing tests

The technical specifications rest on extensive tests and technical research. Due to the variety of possible influences during refinement, and use, the specifications should be viewed as reference values. We recommend a suitability test on the original material. A legally binding warranty of specific characteristics cannot be derived from our specifications.
